SONANCE

Gain total visibility and control of your communications data

Are you struggling to keep up with the ever increasing number of communications channels, data streams and reporting requirements?

There's a better way

Sonance delivers automated communications oversight, compliance reporting and business intelligence.

Communications Surveillance

To comply with regulations like MIFID II, firms must monitor, capture and archive all of their regulated employee communications.

This is an enormous challenge given the number of communications channels, evolving regulatory landscape and massive reporting requirements.

This is especially true for firms that have manual processes that rely on legacy systems where data sits in unsynchronized databases, spreadsheets and trading systems.

With Sonance, firms can oversee, manage, control and report on all their communications wherever their employees are and from whichever communications channels they use.

SONANCE Benefits

✓ Capture and Record

Capture multiple audio channels and transcription data

✓ Data and Reporting

Aggregate all communications data where it's instantly available, normalised and indexed

✓ Identify Risky Behaviour

Analyse your communications data in real-time

✓ Instant Search and Access to Data

Powerful search functionality enables instant identification and retrieval of any communication at any time

The Speakerbus Advantage

SONANCE can be integrated with QORUS and CADENCE

QORUS Trading Communications Portfolio

Speakerbus Qorus portfolio offers a comprehensive suite of applications, soft clients, devices and services to suit any trading communications requirement.

CADENCE Connect without Compromise

Real-time, digital trading cloud communications you can count on, no matter what.

Every connection is worth more

The Speakerbus Group is a leading provider of digital communications solutions that power the financial markets. Our portfolio of collaboration, connectivity and compliance solutions help trading organisations gather information, gain insight, make decisions, build relationships and execute trades.

Expertise

Speakerbus is a recognized leader in critical voice communications with a reputation for delivering exceptional technology, expertise and service to customers in the financial trading and command & control sectors worldwide.

Support

Excellent platforms, products and applications are only one piece of the puzzle. That's why our advanced engineering and support services are available 24/7.

Long-term

For 35 years, Speakerbus has been recognised for always having a customer-first approach, striving to provide consistently excellent and personalised service.
